

## Music for Children with Autism!

Do you have a child who:

- Is between 6 and 12 years old?
- Has a diagnosis of autism spectrum disorder?
- Speaks in at least 2 to 3 word phrases?
- Understands simple directions in English?
- Can identify happy, sad, and mad emotions?

**If so, your child may be eligible to participate in a study about identifying emotions in music and in speech!**

The study lasts **only an hour**, and conveniently takes place at Tempo!  
Music Therapy Services in Nutley, NJ!

You will need to bring your child to the appointment.

At the conclusion of the study, you will receive a free consultation regarding your child's results.

If you would like to be a part of this study, please call or email:
