

HOPE for Nutley, the Nutley Municipal Alliance and NHS present:

# The Teenage Brain

## What makes it work???

Learn from nationally acclaimed expert Dr. Jill Williams what makes a teenage brain work. Not only will Dr. Williams explain the inner workings of the teenage brain, but she will also provide the latest research and information on trends in teen substance use including vaping and use of marijuana and how it may affect the teenage brain. With the legalization of marijuana on the near horizon this becomes critically important.

**Jill M. Williams MD**

Professor of Psychiatry  
Director, Division of Addiction  
Psychiatry Rutgers University  
Robert Wood Johnson Medical School  
NHS Graduate, Class of 1985

This session will:

1. Review basic mechanisms of brain development
2. Discuss current trends in youth substance use and misuse
3. How the brain can be impacted by substances

Tuesday, March 26, 2019  
7:00- 8:30 pm  
John Walker Middle School  
325 Franklin Avenue
