- **Are you tired of \$20 or less commission on an individual plan because your client is not group compliant?**
- **Are you frustrated by your client complaining about \$2,600 per month family premium that only allows his family to go to New Jersey doctors?**
- **Can't buy Health Insurance for your client because he doesn't have a "Special Enrollment Period"?**

We now have an association/Union national PPO plan that pays you 4% commission, uses the national United Healthcare PPO network, can enroll the first of any month and has a family rate of less than \$1,700 per month.

What's the catch???

- **Your client either has to be an employee or be self-employed [1099 or Schedule C]**
- **To keep premiums in line this plan is medically underwritten [average annual increase over the last 10 years has been 6%.**
